

Technical Data Sheet

Standard Stainless Steel Base Set for Mooring Whips (2 pcs)

Product Description:

The YF rear axle base provides a secure attachment for rear axles, enhancing vehicle stability and performance. Designed with precision engineering and constructed with durable materials, this component ensures reliability and longevity, even under high mechanical stress.

Technical Specifications:

Material: Stainless steel (polished finish)

Base diameter: \varnothing 113.00 mm

Inclination angle: 58.27°

Central hole diameter (internal): \varnothing 31.50 mm

Mounting hole diameter: \varnothing 9.00 mm

Base height (axle): 113.00 mm

Insertion tube diameter: \varnothing 16.00 mm

Applications:

This rear axle base is ideal for vehicles requiring a strong and reliable rear attachment, offering high performance in both industrial and on-road applications.
